

NAB does not have the right to request that MY freedom to listen BETTER programming of all types, ie; music ,sports and news. The whole concept is much improved over the traditional system that they want us stuck with. Most of the stations will not offer traffic reports in Phoenix, you need to switch to AM to get it, and then it is only a couple of times per hour. That is not service I feel is requiered for traffic reports.

The next issue that I feel strongly about is the programming. The station that plays rock music in Phoenix, KSLX, has been written to several times by myself and freinds I know about the repititious format of playing just a few of the many thousands of songs available, over and over , every day the same one's!!!!!!! They respond with "We determined that this is what you people want to hear and our survay's show you only listen to us for 15-20 minutes a day, so we play the songs over and over so that you will hear your favorite song when you turn us on. Well, they are wrong about me! I do not want to listen to the same songs every day, all day.

XM has done a very good job of finding music that is unplayed on terrestrial stations. They have only us, the listeners, to worry about, because we pay for it and that is what drives my desciesion to write to you. Let NAB figure out why they have failed. Let them make adjustments to their way of serving us, let them respond like all othrer businesses do, not by passing legislation to insulate them from the world of consumer rights and demands. Thanks, Jim
